The entire session was very much informative for all the participants and technical discussions has helped everybody to understand the importance of Intellectual Property Rights in everyday life.

Objective:

To understand the process of protecting innovative ideas with the help of Intellectual Property Rights

Event details:

Gujarat University Start-up and Entrepreneurship Council has organised a webinar on 30th March 2022 on the theme a Certificate Webinar on All about Intellectual Property Rights: Understanding how can innovative ideas be protected. Resource person of the webinar was Mr. Shrijay Sheth, Co-founder of Legalwiz and the entire program was moderated by Priyanka Bajaj. The webinar included key elements of IPR that includes Patents, Copyrights, Designs, Trademarks/ Service marks, Trade secrets/ Confidential Information and Geographical Indication. Trademarks are being protected both nationally and internationally as one can apply for registration of trademark in any countries or jurisdictions where they provide goods and services. Intellectual property can be protected in multiple countries by following WIPO (World Intellectual Property Organization) system. It is a centralized filing system that allows all the signatories of the Madrid protocol and Agreement to have a uniform and common system for filing Trademark Applications. Apart from this, the session included information regarding types of patent application. There are two types of patent application, the first one is Provisional Application and it is filed when an invention is under the process of being completed. This helps the inventor in protecting their innovation while it is still being finalized and helps in protecting the priority date. The provisional application gives inventor 12 months to file a complete Patent Application. Another type is Complete application and it is considered to be the final application filed by an applicant. As per this application, once it is filed no changes can be done in context of the claims and the drawings. Complete application can be filed if the applicant is very much sure about the invention and don't want to opt for any further changes. The entire webinar has helped all the participants to understand the concept of Intellectual Property Rights and gain technical knowledge regarding the process of patent searching and filing.

10. Mandatory Submission:

a) Flier

Students, Faculty Members and Staff of Adamas University actively Participated in

Online Certificate Webinar on

"All about Intellectual Property Rights: Understand how can innovative ideas be protected"
